BYOD Specifications Grades 4-8

Pardes Jewish Day School's Bring Your Own Device (BYOD) program utilizes students' personal technology at school to further enhance learning effectiveness. The BYOD program makes a 21st century classroom possible. The use of technology fosters student ownership of learning, creates a smooth transition from home to school, provides easier access to online materials, and facilitates communication and collaboration with other students and teachers. Learning to properly navigate the internet is an important skill.

The responsibility for maintenance, repairs, and replacement of a laptop, operating system, and software fall upon the student and his/her parents. Pardes will not be responsible for a broken or unusable device.

Laptops must be brought to school fully charged each day. Just in case, we suggest students bring their own charger daily.

Please refer to the Parent/Student Handbook for the specifics about our school's technology policies.

Laptop Specifications:

Device Type	Operating System	Wireless	Storage Capacity	RAM	Minimum Battery Life	Suggested Accessories
PC	Windows 10 or above	5GHz (wireless AC)	128 GB hard drive	4 GB minimum	6 hours	Protective case, carrying case, headphones or earbuds
